Skilled Rehabilitation Services

Legacy Health Services
 Our Family Caring for Yours

Welcome to Pleasant Lake Villa

Make yourself at home by the fireplace, sip cappuccino in our Internet café or join in a variety of fun activities. Your comfort is our priority.

We are a family-owned and operated health care community, where you can expect personalized care and support. Our professional caregivers treat everyone like family – with dignity, respect and compassion.

Short-term rehabilitation, long-term care, skilled nursing and assisted living are available, along with specialized programs, including orthopedic rehabilitation, respiratory care, complex wound treatment, respite and hospice care.

Stop in. We are conveniently located in Parma, minutes away from Parma Community General Hospital, major freeways, medical facilities, shopping and entertainment.

“Everyone is very loving, caring and compassionate – they treat you like family here.”

Lori, family member

Our goal is to help you return home!

An illness, injury or surgery can impair your ability to move or function on your own. Short-term rehabilitation therapy can help you regain, develop or maintain the strength or skills necessary to live independently.

Based on your condition, your doctor may have prescribed Physical, Occupational or Speech therapy – or a combination of multiple therapies. Our therapists will collaborate with you, your family, your physician and health care team to create and implement a therapy plan tailored to your needs, goals and preferences.

Incorporating activities or hobbies that you enjoy into your therapy program may contribute to your progress and help you maintain ongoing success.

Your individualized plan of care may include one or more of the following therapies:

Occupational Therapy helps develop the strength and skills necessary to independently perform the activities of daily living, such as dressing, eating and toileting. Therapy targets upper-body strength, coordination, range of motion and fine motor skills.

Physical Therapy focuses on restoring independence when movement or functional abilities have been compromised by an illness, injury or condition. Treatment and exercise help optimize movement, balance, strength and conditioning.

Speech Therapy diagnoses and treats speech, swallowing and memory problems caused by a wide range of conditions and disorders.

Qualified, In-House Staff

Our licensed staff therapists are an integral part of our tenured health care team. Working together, your team will develop a personalized plan of care.

You will work closely with an experienced therapist who knows you, understands your goals and supports you every step of the way. We believe that when you build a relationship based on trust and understanding, you will likely have a better experience and improved outcomes.

We also have full-time nurse practitioners with specialized master’s-level training and the state-of-the-art equipment required to treat high-acuity patients with multiple conditions, including:

- Strokes
- Fractures
- Neurological disorders
- Post-operative recovery
- Balance disorders
- Arthritis
- Respiratory disorders
